

Output

----- Cyclomatic Complexity Calculation -----

Edges (E) = 17

Nodes (N) = 13

Predicate Nodes (P) = 5

Cyclomatic Complexity $(V(G) = E - N + 2) = 6$

Cyclomatic Complexity $(V(G) = E - N + P) = 9$

Cyclomatic Complexity $(V(G) = P + 1) = 6$

All methods match.

Cyclomatic Complexity = 6

Program finished.

Variables

Name	Type	Value
E	Integer	17
N	Integer	13
P	Integer	5
CC1	Integer	6
CC2	Integer	9
CC3	Integer	6
